Fonts

The *Charis SIL* and *Charis SIL Compact* fonts are installed with the Ma'di keyboard layout. These fonts are available under the Open Font License. Other suitable fonts include:

- African Sans Serif
- African Serif
- Andika and Andika Compact
- DejaVu Sans
- Doulos SIL Compact and Doulos SIL
- Gentium Basic and Gentium Book Basic

- [Gentium Plus and Gentium Plus Compact](#)
- [Liberation Sans](#)

Core fonts on WIndows 7 and Windows 8 should also be suitable.

The compact version of the SIL fonts have a tighter line spacing, so lines of text will appear closer together than when text is displayed using the original (non-compact) versions of the same font.

[Literacy versions](#) of Charis SIL, Charis SIL Compact, Doulos SIL, Doulos SIL Compact, Gentium Plus and Gentium Plus Compact are available.
